It is certified that error appears in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

Column 7 Claim 4, lines 8-24, should be corrected as follows:

Claim 4. A shipping and display box for containers of product, comprising:

a bottom wall, opposite end walls, and opposite side walls disposed orthogonally to the end walls to define and elongate rectangularly shaped box having four corners; and

angled interior corner panels extending across two diagonally opposite corners of the box, defining a generally parallelogram-shaped interior space in the box, whereby a number of containers can be placed in the box in nested, offset relationship to one another in a parallelogram-shaped arrangement that conforms closely to the interior shape of the box, said elongate rectangular shape of the box enabling the boxes to be cross-stacked and interlocked with one another to produce a stable stack of the boxes.

This certificate supersedes the Certificate of Correction issued February 24, 2009.
